

HR Employee Attrition Dashboard

Workforce Overview

Our workforce of 1,470 employees spans three core departments. This section provides a demographic snapshot showing who makes up our organization — by department, gender, marital status, and travel patterns. Understanding workforce composition is the foundation for interpreting attrition trends in the sections that follow.

Attrition Drivers

This section examines who is leaving and identifies the key demographic and work-related factors driving attrition. We analyze patterns across age groups, marital status, job roles, tenure, commute distance, travel requirements, and work-life balance to pinpoint which employee segments face the highest turnover risk.

Drivers: Compensation

Compensation is a critical retention lever. This section explores how salary levels, recent raises, and stock options correlate with attrition rates. We examine average income by department and role, and assess whether competitive pay and meaningful raises are protecting against turnover.

Drivers: Engagement & Satisfaction

This section explores the relationship between employee engagement metrics and attrition, focusing on job satisfaction, environment satisfaction, work-life balance, and training opportunities. Research consistently shows that satisfaction and engagement are strong predictors of retention, making these metrics critical leading indicators for potential turnover.
